Untitled -TextEdit

File Edit View Help

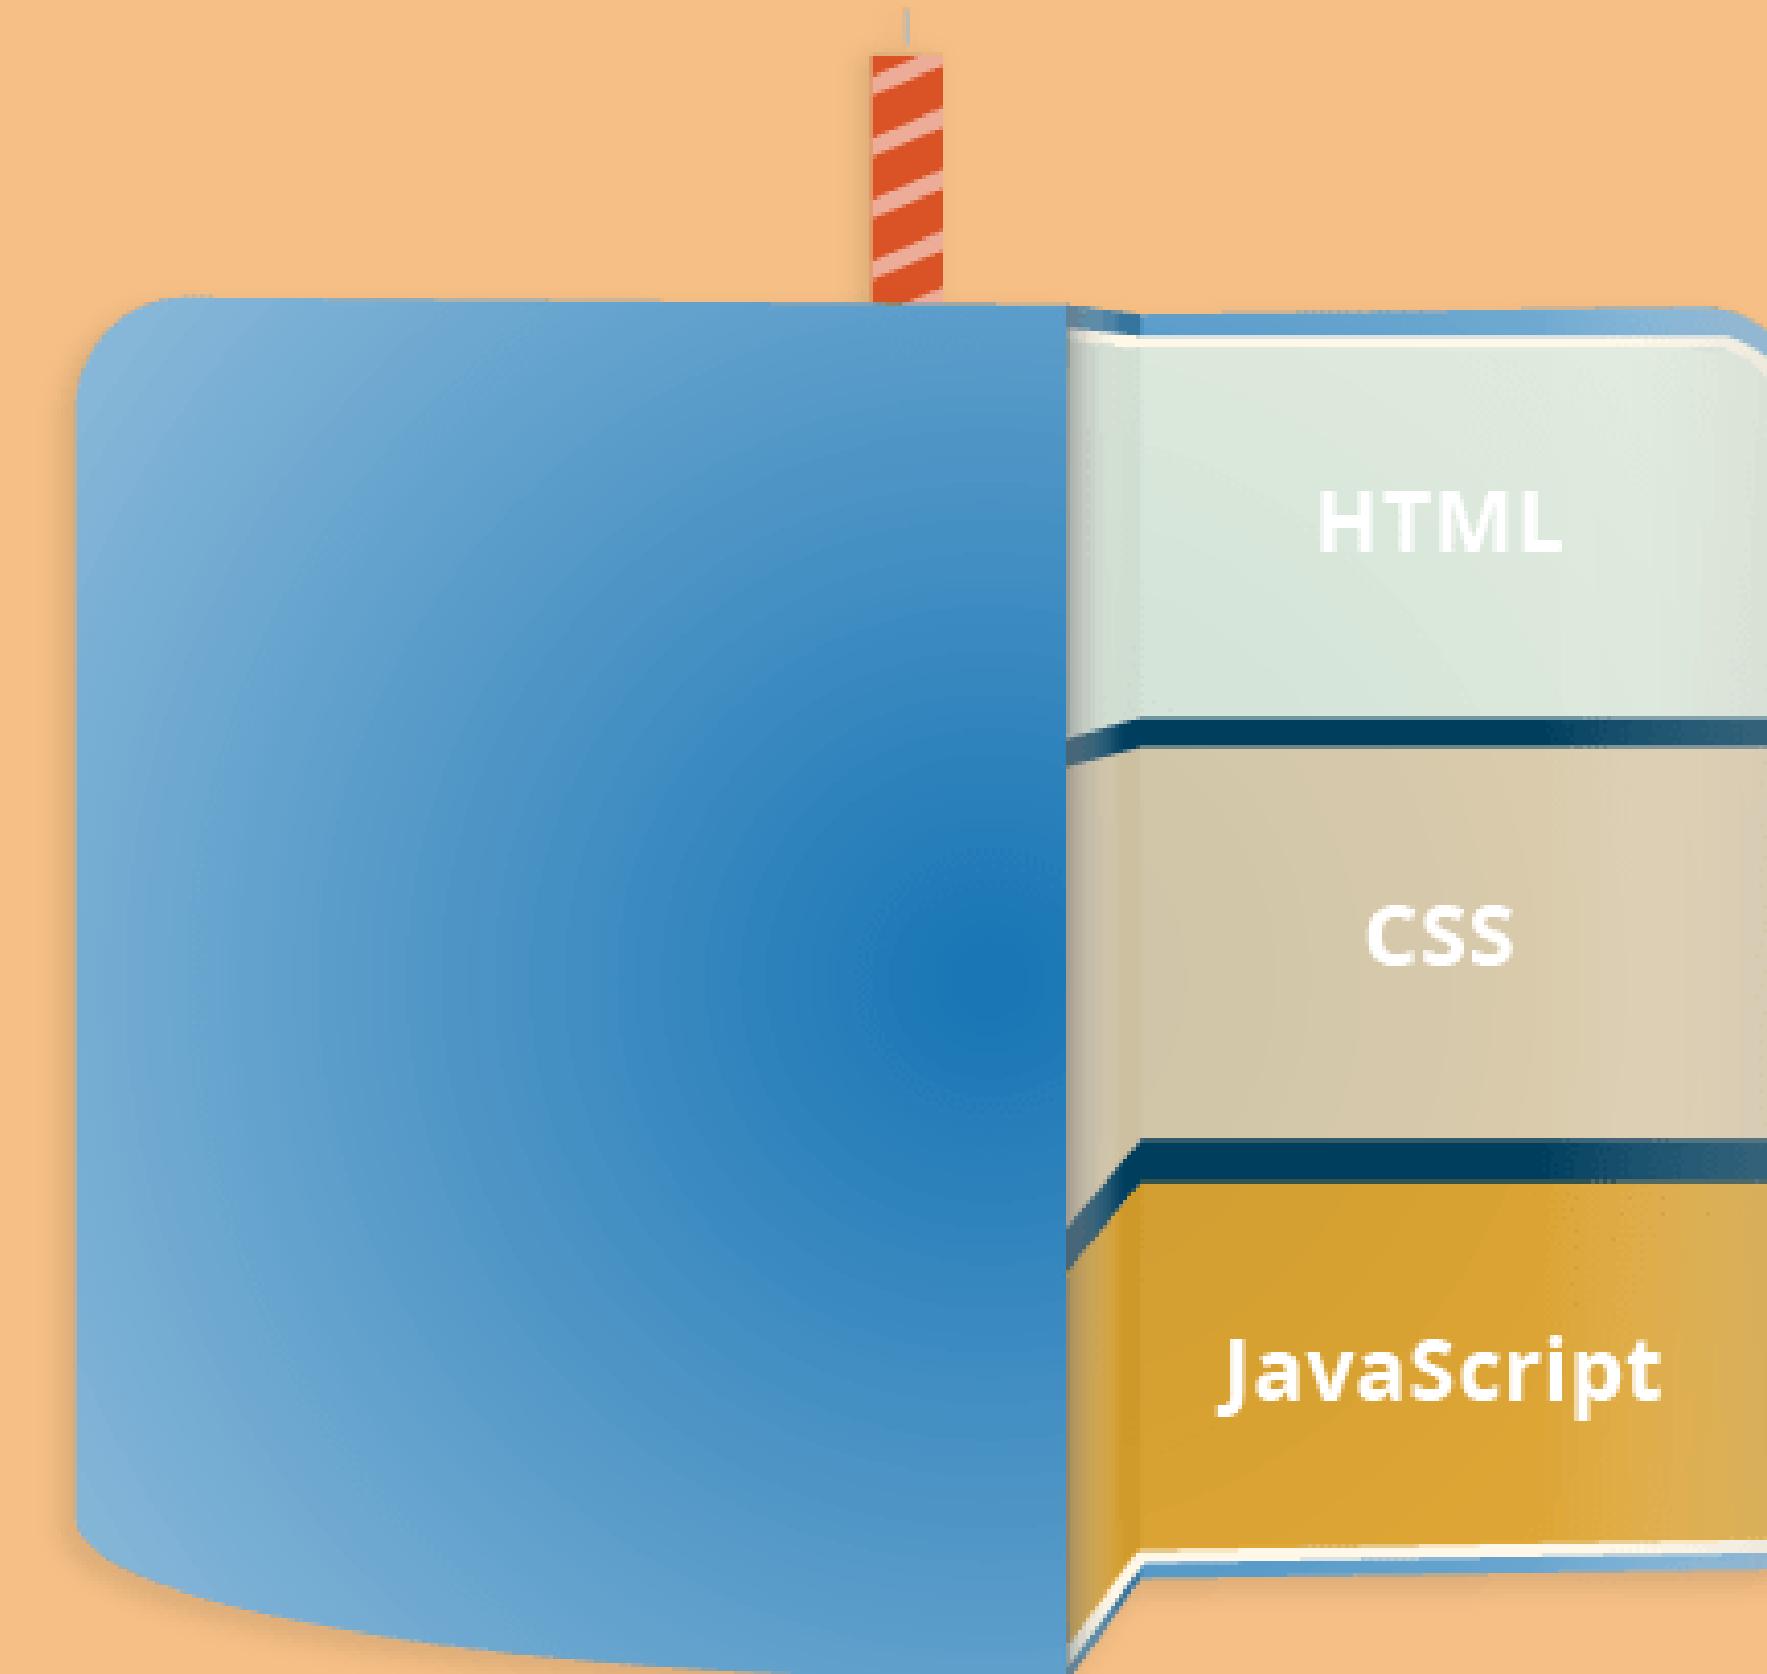

01	JavaScript: O que é?
02	Página de Contato no Portfólio
03	Váriaveis e Constantes
04	Tipos de dados e Operadores
05	Boas Práticas Gerais
06	Finalização da Aula

A screenshot of a Microsoft Word document titled "Untitled -TextEdit". The document contains a table with six rows. The first column contains numbers 01 through 06, and the second column contains text descriptions. The descriptions are: "JavaScript: O que é?", "Página de Contato no Portfólio", "Váriaveis e Constantes", "Tipos de dados e Operadores", "Boas Práticas Gerais", and "Finalização da Aula". The cursor is positioned over the text in the second column of the first row. The Word ribbon is visible at the top, showing tabs like Home, Insert, Page Layout, etc. The left sidebar has icons for File, Find, Replace, and other document functions.

The screenshot shows the Visual Studio Code interface with the following details:

- File Explorer (Left):** Shows a single file icon labeled "1".
- Search Bar (Top):** Contains "Search" and "Aa ab.\*".
- Code Editor (Main Area):** Displays the content of "index.html".

```
<!-- Contato -->
<section class="container contact">
    <!-- Tabela Contato -->
    <form>
        <div class="table-contact">
            <div class="field name" id="name">
                <input type="text" placeholder="Name" required>
            </div>
            <div class="field email" id="email">
                <input type="email" placeholder="E-mail" required>
            </div>
        </div>
        <div class="field subject" id="subject">
            <input type="text" placeholder="Assunto" required>
        </div>
        <div class="field contnent" id="contnent">
            <textarea cols="30" rows="10" placeholder="Mensagem" required></textarea>
        </div>
        <div class="btn" id="send">
            <button class="btn_primary btn_secondary" type="submit"> Enviar </button>
        </div>
    </form>
</section>
```
- Status Bar (Bottom):** Shows "2 selections (10 characters selected)", "Spaces: 4", "UTF-8", "CRLF", "HTML", "Port: 5500", and icons for file operations.

## Para quê?

Utilizamos constantes para **evitar que haja alterações** nas variáveis e nos dados referidos ou atribuídos.

Assim como o **let**, a **const** tem escopo de bloco.
